The *Cecil County Bicycle Plan* seeks to improve quality of life for residents and visitors by expanding the transportation system to foster safe, inviting and convenient bicycling. A bicycle network will be proposed throughout the County and within each of the Towns.

County residents and other stakeholders are invited to a second countywide workshop for the plan. Draft short- and long-term recommendations will be presented and attendees are asked to provide additional input for both incorporated and unincorporated areas of the County. Comments will be incorporated into the draft document presented to the Cecil County Board of Commissioners and Town Councils.
