

Concept for the Valley Road Pedestrian Walkway and Bike Lane

1. Begins at the Lantana Square pedestrian crossing lane, on the Lantana Square/Post Office side of Valley Road and ends at the asphalt path at Evanson Road.
2. The Lantana side traffic lane will be reduced to 11' feet but still centered at its current position.
3. A 10' shoulder will be shared with a 5' marked bike lane. At this time the bike lane will only be this side of the road.
4. A curb will be installed to direct storm water run off to the sewers.
5. A 3' grass strip will run next to the curb in most areas.
6. A 6+ foot wide walkway of asphalt will be installed the full length.
